

WHAT'S A PRACTICE OPTIMIZATION ANALYSIS?

A Practice Optimization Analysis (POA) is a FREE, comprehensive assessment of the current state of your dental practice. It not only determines how your practice is performing today, but uncovers ways you can enhance your operations moving forward. This includes ways to:

Increase Overall Profitability

Using a blend of proven expense management techniques and implementing more efficient workflows.

01

Reduce Operating Costs

Identifying cost reduction strategies, including ordering habits, inventory levels and standardization opportunities.

02

Increase Production & Revenue

By working smarter, not harder through workflow analysis and redesign.

03

Assessing Your Fee Schedule

Ensuring your fees are in-line with your area and for all the insurance networks you participate in.

04

Maximize Reimbursements

Improving your insurance reimbursements using coding and utilization best practices.

05

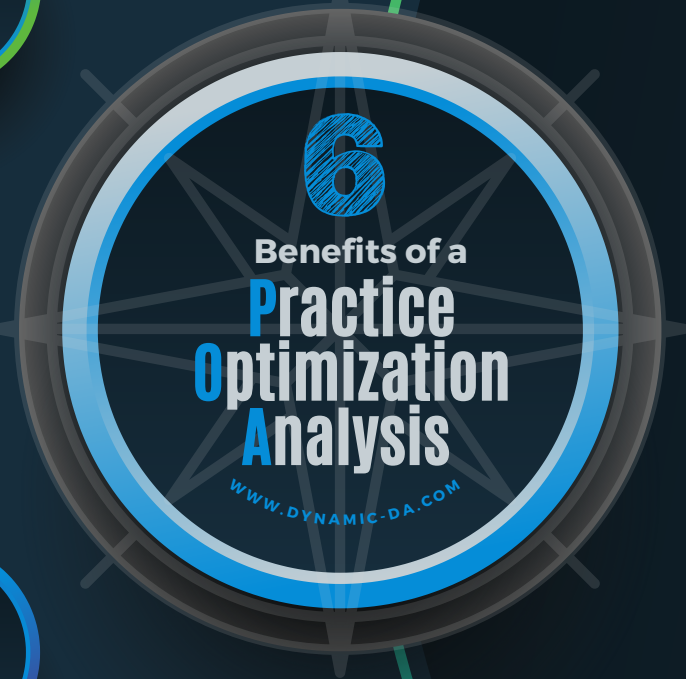

Establish Performance Metrics

Reviewing your profit & loss statement and selecting key practice performance metrics.

06

A POA is your guide to building a roadmap for a more sustainable, successful future for your solo or group dental practice.
